Flying Training

The demand for the pilot license holders is again growing stronger and the aspirants can now actually see their dreams flying to reality. IIASTM, with its specialization in aviation and extensive experience in national and international pilot training is among a selected few in India and is proving to be a perfect launch pad for pilots with its International associations for the best possible Pilot training.

The job of a pilot is a highly specialized one. It requires knowledge of air navigation, interpretation of meteorological reports, operating sophisticated electronic and mechanical controls, leading the aircraft under adverse circumstances, and being a leader to the flight crew and passengers under climatic and other emergency situations.

You will be responsible for the passengers, the crew and the aircraft. Hence you must have discipline, patience, responsibility, punctuality, commitment and self-confidence.
